

Welcome to Cherokee Brick

The heritage of brick construction dates back to ancient times, forming the foundation of notable structures throughout human history. Cherokee Brick is proud to carry on the tradition laid by generations of brickmakers in delivering construction solutions that will withstand the test of time.

Founded in 1877, Cherokee Brick has sought product innovation as a professional hallmark, continually refining our production and laying processes to fit and enhance nearly any application. Back then, we only produced a single crude type of brick, but we now have the capability to manufacture over 100 different varieties from our Georgia and Mississippi plants. Our capacity has similarly expanded, allowing us to meet the demands of customers hailing from diverse industries nationwide.

The nature and history of our business is one of continuous change. There have been advancements in the materials and brick manufacturing methods which have resulted in significant improvements in quality and consistency. We haven't changed what made us a preferred brick provider for builders, and that's the quality and integrity our company was founded on and, to this day, strives to maintain.

Cherokee Brick Company supplies the highest quality brick to homebuilders, contractors, and remodeling professionals across the nation. With a little help from Cherokee, you can create a truly distinctive building project that exceeds all expectations.

Build distinctively, build with Cherokee Brick.

NOTES

1. Unless specified by the customer in writing at the time the order is placed, the manufacturer will decide whether shapes will be cored or solid. Angular tolerances will be ± 3 degrees.
2. Shapes, other than what is shown, can be made from detailed drawings.
3. Manufacturer requires detailed drawings before pricing or manufacturing any shapes not shown or listed.
4. All orders for special shapes must be submitted in writing and accompanied by the necessary drawings (see note 3 above) before being scheduled for manufacturing.
5. Color and texture of certain shapes may vary slightly from that of the face brick.
6. Orders for special shapes may not be cancelled in whole or in part when shapes are in the process of being manufactured or after they have been completed.
7. Small quantities of certain shapes may require a set-up charge.
8. "Add-on" orders of special shapes that are placed after original quantities have been manufactured are subject to a set-up charge.
